

CANADA PIPELINE ACCESSORIES

CPA Fluid Dynamics

Computational Fluid Dynamics (CFD) allows for the study of velocity profiles, pressure drop, swirl, turbulence profiles as well as the effect of piping layout, pipe fittings and pipe obstructions.

Wide range of supported fluids: air, water, methane, carbon dioxide as well as others. An infinite range of Reynolds Numbers and pressures are supported as well.

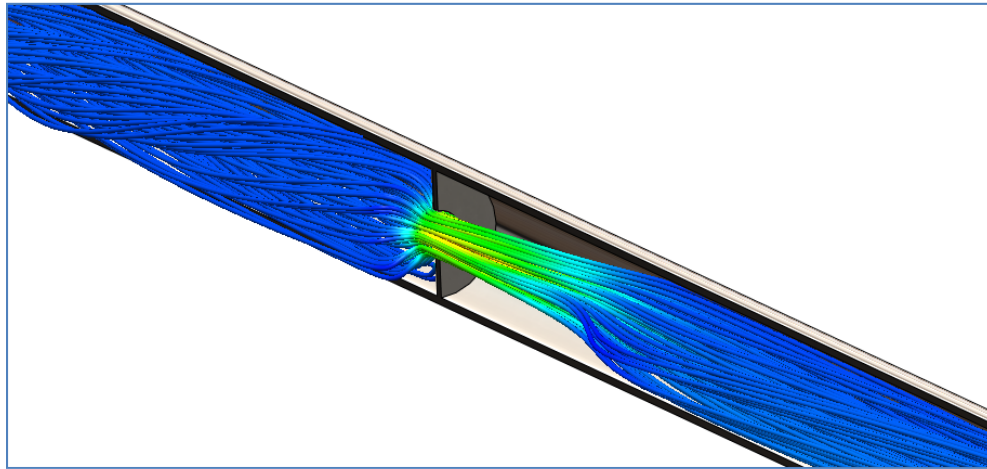

Allows you to identify potential meter station problems before it is built.

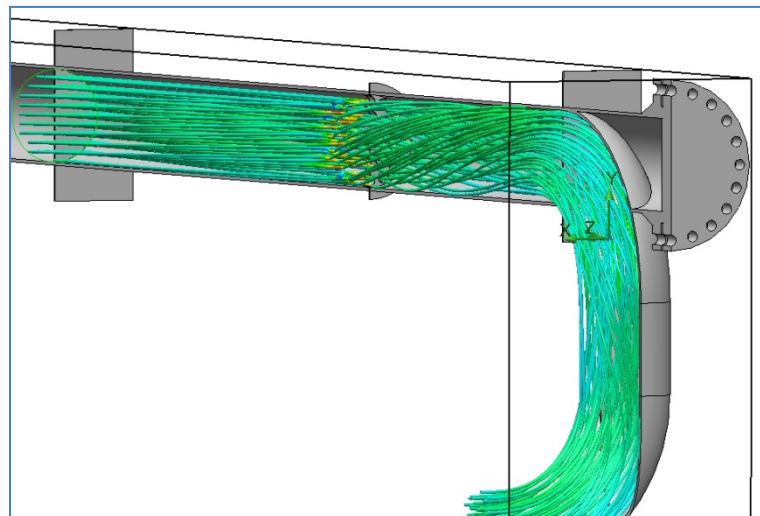

CANADA PIPELINE ACCESSORIES

CPA Fluid Dynamics

Helps reduce long term metering life cycle costs (capital and operating).

Real, immediate benefits!

Please email dannysawchuk@telus.net or call 403.236.4480 to discuss applications and pricing.
